Dealer notes

2024 Ford Mustang GT Premium StreetHunter — Supercharged, Six-Speed SEMA Show Build One-of-One Build as Identified by Its Appraisal | 850 Horsepower Reported | Professionally Appraised at $255,000 Supreme Motors is proud to offer this extraordinary 2024 Ford Mustang GT Premium, a StreetHunter Designs creation that combines show-car presence with supercharged Coyote power and a six-speed manual transmission. Built for the 2024 SEMA show, this Mustang takes the muscular proportions of Ford’s S650 platform in a bold, unmistakably custom direction. bringatrailer.com Its accompanying professional appraisal identifies this example as a one-of-one StreetHunter build—a distinction reflected in its extensive bodywork, custom wheels, and carefully coordinated appearance. For the enthusiast who wants something truly individual, this is a Mustang with a story and a visual identity all its own. Sculpted Widebody Styling Originally finished in Dark Matter Gray Metallic, the car wears a matte metallic gray wrap that accentuates every contour of its dramatically widened body. StreetHunter’s transformation includes a vented hood, substantial fender extensions, custom front and rear spoilers, and a sculpted rear diffuser. An extended front lip, aerodynamic canards, rocker-panel extensions, and a ducktail rear spoiler further define the profile. Aftermarket headlights add another custom touch. Together, these elements give the Mustang a low, broad, purposeful appearance that commands attention from every angle. bringatrailer.com Supercharged Coyote Performance with a Manual Gearbox The centerpiece is Ford’s 5.0-liter Coyote V8 equipped with a VMP supercharger. The professional appraisal reports 850-plus horsepower, placing this build well beyond the output of a standard Mustang GT. A six-speed manual transmission provides the direct mechanical involvement enthusiasts seek, while a limited-slip rear differential completes the rear-wheel-drive powertrain. The earlier auction description further identifies a Roots-style supercharger, carbon-fiber intake pipe, and MagnaFlow exhaust. bringatrailer.com The result is a compelling combination of muscular presentation, substantial reported power, and an engaging three-pedal driving experience. TJ Hunt’s signature on the radiator shroud provides a distinctive finishing detail beneath the hood. Custom Wheels, Adjustable Suspension & Brembo Brakes The chassis modifications complement the dramatic exterior. Adjustable BC coilovers allow the suspension setup and ride height to be tailored, while custom 20-inch Apex ML10 wheels, identified as one-of-one in the appraisal, reinforce the car’s individual character. The wheels feature bronze centers, polished lips, and StreetHunter logos on their barrels. Toyo Proxes R888R tires measure 285/30 in front and 315/30 at the rear, filling the widened arches. Braking hardware includes six-piston front and four-piston rear Brembo calipers paired with ventilated rotors. bringatrailer.com Recaro Seating & a Modern Driver-Focused Cabin Inside, Black Onyx leather Recaro front seats provide a sporting focal point, with matching upholstery on the door panels and shifter boot. Carbon-fiber trim carries the custom performance theme into the cabin without

losing the modern character of the GT Premium. A configurable 12.4-inch digital instrument cluster presents vehicle information directly ahead of the driver, while the angled SYNC infotainment touchscreen keeps the center controls within easy view. The auction listing also specifies a heated flat-bottom steering wheel and dual-zone automatic climate control. bringatrailer.com Documented Professional Appraisal The vehicle is accompanied by a July 6, 2026 appraisal from Westside Classics, prepared by William Presley, a certified and licensed automotive appraiser in Oregon. The report assigns the Mustang an appraised value of $255,000 and records 5,900 miles at the time of inspection. The appraiser described numerous areas—including the carpeting, dashboard, headliner, gauges, engine compartment, exhaust, and underside—as being in as-new condition. The report also noted no leaks and no accident history. These findings document the appraiser's observations at that inspection; the valuation represents his opinion of value as of the appraisal date. With its StreetHunter identity, SEMA history, supercharged V8, manual transmission, and extensive custom equipment, this Mustang offers a distinctive opportunity to own a thoroughly transformed example of Ford's latest-generation pony car.
