Dealer notes

Zoom Classic Cars presents this One owner, custom factory ordered 2015 Dodge Challenger SRT 392 HEMI. A spectacular, exceptionally preserved modern American muscle car with just 9,800 original miles. This 2015 Dodge Challenger SRT 392 HEMI was custom ordered new by its original owner, purchased new, and configured with an impressive collection of factory equipment and desirable options. Today, it presents in absolutely stunning condition inside and out, runs and drives beautifully, handles exceptionally well, and delivers the unmistakable sound and character that have made the HEMI-powered Challenger an enthusiast favorite. The 2015 Challenger combined unmistakable classic-inspired styling with modern performance, technology, and everyday usability. In SRT 392 trim, it pairs the Challenger's muscular proportions with the legendary 6.4-liter HEMI V8, an advanced performance chassis, Brembo braking, and the equipment expected of a premium modern muscle car. With its low mileage, original-owner provenance, and documented factory configuration, this example offers an especially compelling opportunity for the Challenger enthusiast or collector. nder the hood sits the 6.4-liter (392-cubic-inch) HEMI V8, equipped with Chrysler's Multi-Displacement System (MDS). Factory-rated at 485 horsepower and 475 lb-ft of torque, this naturally aspirated V8 delivers the powerful acceleration, deep exhaust note, and responsive performance that define the modern SRT experience. Power is delivered through the factory TorqueFlite eight-speed automatic transmission, providing quick, smooth shifts and excellent flexibility across a wide range of driving conditions. The car also features the SRT performance suspension, a 3.09 rear axle ratio, and Brembo six-piston high-performance brakes with ABS. The result is a Challenger that feels as good on the road as it looks standing still—and sounds every bit as special as a 392-powered HEMI should. Finished in Billet Silver Metallic Clear Coat over a black Laguna leather SRT interior, this Challenger has a purposeful, understated appearance that suits its SRT performance credentials. The original factory window sticker shown in the photo gallery documents a carefully selected and tasteful list of optional equipment. Factory equipment and options include: Technology Group Option which includes adaptive cruise control, automatic high-beam headlamp control, forward collision warning, and rain-sensitive windshield wipers. The TorqueFlite Eight-Speed Automatic Transmission complemented by steering-wheel paddle shifters and AutoStick manual shift control. Power Sunroof, Twin Black Center Stripes that add a striking exterior accent enhancing the car's muscular styling. Uconnect 8.4AN Infotainment System featuring an 8.4-inch touchscreen, navigation, HD radio, Bluetooth, and satellite radio capability. 20-inch x 9.5-inch Hyper Black Forged Wheels fitted with 275/40ZR20 Pirelli P Zero summer performance tires and Brembo Red Brake Calipers, a visual highlight behind the forged wheels, paired with the SRT high-performance braking system. Additional factory equipment includes the functional hood scoop, projector fog lamps, LED split taillamps, rear body-color spoiler, high-intensity-discharge headlamps,

rear backup camera, rear park assist, blind-spot monitoring with rear cross-path detection, keyless entry and push-button starting, heated and ventilated front seats, heated steering wheel, dual-zone automatic climate control, and an 18-speaker Harman Kardon premium audio system with subwoofer and 900-watt amplifier. With only 9,800 original miles, this Challenger SRT remains in truly exceptional condition. The exterior is flawless, the interior is beautifully preserved, and the car presents as a remarkably well-kept example of the 2015 SRT 392. Its overall condition reflects the care afforded to a vehicle purchased new by a single owner and driven sparingly over the years. Behind the wheel, this Challenger delivers the complete modern HEMI experience. It runs beautifully, accelerates with authority, shifts smoothly, and handles with the confidence expected of an SRT-equipped performance car. The exhaust note is particularly satisfying, providing the deep, unmistakable soundtrack that makes a naturally aspirated 392 HEMI so appealing. This is not simply a low-mileage Challenger. It is a carefully specified, individually ordered example with the desirable combination of SRT performance, premium comfort, advanced technology, and striking factory styling. Examples with fewer than 10,000 miles, single-owner history, excellent original presentation, and their original window stickers are increasingly attractive to enthusiasts seeking a well-preserved, factory-configured car. The custom-order history and specific combination of factory options make this particular Challenger distinctive. While it cannot be verified as the only example built with this configuration without factory production records, its individual specification and documented history give it a compelling identity of its own. Car is stored in MA with clean title in the owner’s name and comes with build documentation and a car cover. Call Jeff for more information or to schedule a viewing. Thanks for looking!
