Dealer notes

2018 Volkswagen Beetle 2.0T S Convertible: Only 36,383 Miles, Clean History Deep Black Pearl • Black Power Soft Top • Titan Black V-Tex Leatherette Put the top down and enjoy Arizona. This 2018 Beetle 2.0T S Convertible has just 36,383 miles. That works out to well under 3,000 miles a year with its long-term owner, so it has barely been driven. It wears Deep Black Pearl paint with a black power soft top and a Titan Black interior. Clean History No accidents or damage reported on Carfax or AutoCheck Clean title with no salvage, flood, rebuilt or odometer brands AutoCheck score of 90, above the 79–88 range for similar vehicles 8 years with one personal owner in California Recently serviced: oil and filter changed 08/2026, plus 30,000-mile service and A/C service records Performance 2.0L turbocharged 4-cylinder (2.0T) 6-speed automatic with manual shift mode Selectable driver modes and dynamic steering Up to 33 MPG highway (EPA 26 city / 29 combined) Independent multi-link rear suspension Comfort & Convenience Power soft top Heated front seats Leather multifunction steering wheel with audio controls Cruise control, power windows and locks, remote keyless entry Heated power mirrors and heated washer nozzles Technology & Safety Touchscreen audio with Bluetooth, USB and voice recognition Premium 8-speaker audio Rear parking camera and rear parking distance sensors Hill hold assist, tire pressure monitoring, rollover protection system 16" alloy wheels, rear spoiler, projector-beam headlights, LED side indicators Why this one? Most 8-year-old convertibles have seen a lot of sun and a lot of miles. This one has seen neither. It's turbocharged, efficient and simple to own, and it has the clean history to back it up. The End of an Icon: Why This Beetle Matters The Beetle ran for about 80 years before Volkswagen announced the end of production after the 2019 model year, closing the books on one of the longest-running models in automotive history. It came back in 1997 and was restyled in 2011, and this third generation was the last. The final Beetle rolled off the line in Puebla, Mexico on July 10th, 2019, and went straight into VW's museum there. Volkswagen of America's CEO confirmed that there are no plans to replace the Beetle. That makes this 2018 one of the last Beetles ever built, and the convertible is the one people want. The classic air-cooled Beetles went from everyday cars to sought-after classics, and collectors are now starting to treat the last generation the same way. Well-kept, low-mile final-generation convertibles are drawing serious money at enthusiast auctions. With only 36,383 miles, this one is a rare find: a low-mile, open-air version of a car that will never be built again. You can drive it and enjoy it today while owning a piece of automotive history.
