Dealer notes

CLEAN TITLE, ONE OWNER, CLEAN CARFAX, SERVICE BODY, 2016 Ford F-350 Super Duty Service Truck | Heavy-Duty Utility & Work Truck The 2016 Ford F-350 Super Duty Service Truck is built for demanding commercial applications, combining Ford's heavy-duty Super Duty platform with a service/utility body designed for organized tool, equipment, and parts storage. It's an excellent choice for contractors, mechanics, construction crews, electricians, plumbers, maintenance companies, mobile repair operations, and fleet use. CLEAN TITLE • GREAT SERVICE RECORDS ON CARFAX Heavy-Duty Performance Available 6.7L Power Stroke® V8 Turbo Diesel 440 Horsepower 860 lb-ft of Torque Available 6.2L Gasoline V8 6-Speed TorqShift® Automatic Transmission Available 4x4 Heavy-Duty Super Duty Chassis Available Single Rear Wheel or Dual Rear Wheel configuration Tow/Haul Mode Heavy-Duty Braking & Suspension Ford rated the available 2016 6.7L Power Stroke diesel at 440 hp and 860 lb-ft of torque, making it particularly well suited for commercial workloads and heavy towing. Ford From the Road Service / Utility Body The installed service body transforms the F-350 into a mobile workstation, providing excellent storage and organization for tools and equipment. Depending on the specific upfit, equipment may include side storage compartments, locking tool boxes, shelving, work surfaces, hitch equipment, ladder storage, auxiliary lighting, and additional commercial accessories. Because service bodies are aftermarket or commercial upfits, exact compartment layout, body manufacturer, dimensions, payload, and installed equipment should be confirmed on the individual truck. Built for Commercial Work The F-350 platform is an excellent foundation for a service truck because it was engineered for heavy-duty payload and towing applications. Ford offered the Super Duty with commercial-oriented equipment including available warning strobes and other work-site features. Ford From the Road Ideal applications include mobile mechanic service, construction, HVAC, electrical work, plumbing, welding, roadside service, equipment maintenance, telecommunications, utility operations, landscaping, property maintenance, and fleet service. Towing & Hauling Capability The 2016 F-350 platform offered substantial towing capability, with properly configured F-350 models reaching up to 26,500 lbs of fifth-wheel/gooseneck towing. Ford From the Road For a service truck, however, the installed utility body and equipment add significant weight. Actual payload and towing capacity should be calculated using the individual truck's GVWR, GAWR, curb/upfit weight, axle ratio, drivetrain and certification labels rather than the maximum factory F-350 rating.
