Dealer notes

1993 Chevrolet 3500 OBS Cummins Swapped Solid Axle Dually. PLEASE READ DESCRIPTION. We are going to call this truck a project for sale. We did not do any part of the build but here is the details this unit is Cummins swapped as well as Solid Axle swapped using a ram Dana 60 and converted to coil over With four Link suspension. The truck is extremely rust free and we were told to have been a Texas truck. The floor pans in the underbody are flawless, as well as the rocker panels and corners has done a semi custom interior with two tone leather. It has a ratchet shifter by BM and the floor shift four-wheel-drive still operates properly to the transfer case heavy duty front bumper, which encases, the intercooler tubular side steps, extremely oversized exhaust spray in bedliner with gooseneck ball dark tinted windows, Lifted clearing 35 inch tires on fuel, off-road wheels and several other Modifications. We do not know any further history on this truck. It does start run drive shift and operate, but before we commence upon making the project our own, we are offering it for sale. Please call for any exact questions or details again. This is not a build that we performed just a project that came along that has good potential and best of all and extremely rust free body and reasonably decent installed Cummins swap. If you\'re viewing this on any platform other then davis4x4.com or davisautosales.com please go to those websites directly to view more photos and the most accurate information. For financing assistance with multiple credit unions and lenders in state and out of state apply at www.davis4x4.com.
