Dealer notes

2012 International Altec Utility Truck Boom/Bucket Manlift Heavy-Duty Commercial Truck. Diesel powered with the large Altec articulating boom, this low-mileage unit features a 350-pound platform capacity, front bumper-mounted heavy-duty winch with what appears to be brand-new cable, power outriggers, and an automatic push-button Allison transmission. It has an 11'4" traveling height and 55 feet of working height, along with a rear pintle tow ball and air hookups. Equipped with 22.5 Michelin tires, a 105-degree articulating boom, work lights, and plenty more. This truck was locally owned by a power company, so it is not rusty underneath like most units, and it has been fleet maintained since new. As you can see from the photos, even the storage boxes are not beat up and worn down like most commercial trucks. Photos may be similar, as we have multiple of these available. Price does not include \$0 processing fee
