Dealer notes

1987 Ford F150 runs but needs some tinkering. It was converted from efi to carbed and it still needs a bit of tuning. It has a cheaper Amazon carb on it and I’m pretty sure both front and rear floats need adjustment. It’ll start up and run but after a few minutes of running it’ll die out, almost as if getting flooded with too much fuel. Definitely a project but a good start to a solid truck.
