Dealer notes

2000 Ford F650 Custom Monster Truck Mega Mud Project. This diesel truck was being built by the previous customer as a tractor pulling truck with a four link suspension so it could be converted to coil overs but for strength it was left with leaf springs. Already has a mounted divorced heavy duty transfer case, 2.5 ton axles with custom-made extra wide close to 20 inch wide wheels with 44 inch tires yes those tires are almost 4 foot tall so that tells you how big this truck is, it would easily carry a 54 or a large tractor tire or monster truck tire. Interior of this vehicle is basically gutted because he was going to go custom, it has a 7.3 Powerstroke turbo diesel engine and transmission. This truck is a project there are a lot of additional parts that come with it in the bed inside the truck etc. but it is a incomplete project currently. We would love to take the time to finish it but with the massive amount of projects we have currently we're going to let this one go. Call with any questions transportation assistance can be helped with this vehicle will also include transport tires for towing.
