Dealer notes

Monster Diesel Generator / Pest Control Trailer. We have tested this unit and it produces 480 V and comes with two splitter boxes. This unit is configured for bedbug remediation and thermal pest control applications. It includes five temperature-controlled air heater systems, two junction boxes, six or seven heavy-duty electrical cables with 50-amp, 30-amp, and 20-amp connections, and six thermal remediation 110V fans. Additional features include a pintle hitch (which could be converted to a standard ball-mount coupler), landing and leveling gear, multiple wiring connections, drive-over parking stops, and numerous other miscellaneous accessories and components. This is essentially a turnkey setup with an incredible amount of equipment already included. The diesel generator runs perfectly, and the entire unit appears to be a very low-hour setup. The DSE (Deep Sea Electronics) control system functions properly, and it comes with a brand-new spare tire and wheel. The right-side trailer fender does have some minor damage, which has been partially repaired since the photos were taken. If you need any additional technical specifications or details about the equipment, we would be happy to help gather that information. Whether you need a dedicated mobile generator system, a thermal remediation setup, or have another application in mind, this is one seriously unique rig offering substantial savings over purchasing a comparable setup new! Price does not include $0 processing fee
