Dealer notes

*** 2020 TESLA 3 PERFORMANCE *** *** ONE OWNER *** *** DUAL ELECTRIC MOTORS *** ***
MODEL 3 PERFORMANCE ROCKETS WHENT FROM ZERO TO 60 MPH IN LIGHTNING-FAST 3.5
SECONDS, WHILE THE MODEL 3 IS THE CHEAPEST TESLA YOU CAN BUY *** *** ONLY 9K
MILES *** *** As with most EVs, the Model 3 gains speed smoothly and almost silently, with the
electric motor providing strong power from a stop. The rear-wheel-drive Long Range model we tested
sprinted from zero to 60 mph in 5.1 seconds. The Model 3 Performance rockets to 60 mph in just 3.5
seconds-0.4 second faster than the bigger and more expensive Model S 100D. Like all Teslas, the
Model 3 carries its battery under the floor, resulting in a low center of gravity. This helps it change
direction crisply and feel planted and stable in corners. The steering is accurate and well weighted, with
three different settings that adjust the level of steering effort. The ride is firm without being harsh;
without the noise of a gas-powered engine, however, you do hear plenty of noise inside the cabin as
the tires thwack and thrum over pavement imperfections.
